

CUSTOM WOOD MOULDINGS & DOORS

For over 25 years, Brenlo Custom Wood Mouldings & Doors has been the wood moulding supplier of choice among Luxury Custom Home Builders, Architects, and Designers. We have built a reputation in the industry of being passionate about quality.

This superior quality begins in our grinding room with our hand cut knives made from top quality carbide steel. Our knives are then moved to our state of the art moulders where our operators only use kilned dried FAS lumber at a rate of 22 knife cuts per inch. The combination of expertly cut knives, quality rough lumber and cuts per inch, results in a smooth finish free from chatter marks. After a strict defecting program at the end of the milling process all material is transferred to our distribution facility where quantities are confirmed and additional quality checks are completed. Our end result is a wood moulding that has 99% usage and requires minimal preparation for painting or staining.

With just under 200,000 SQFT of distribution and manufacturing space Brenlo keeps an expansive in-stock inventory of trim, doors and plywood to provide customers with the solution needed to complete a project "Right and On Time." Should our stock options not meet the needed requirements our in house CAD team can create and design any trim or door style required. Brenlo currently holds over 10,000 custom profiles for customers and ensure that custom orders are kept in our library. Therefore, if product is needed again it is as simple as referencing the job name. Our advancements in manufacturing allow us to turn custom trim requirements around in 2 weeks and custom doors in 4-5 weeks.

At Brenlo, our company philosophy has always been "The easiest to do business with." This statement resonates with every employee and we look forward to providing you the best quality product supported with exceptional customer service.

CEILING & BEAM COMBINATIONS

DOORS

For Custom and Luxury Home builders, Contractors, Commercial use, and discerning homeowners, choosing premium quality solid wood or engineered construction doors that meet the toughest requirements, means confidence and peace of mind that comes from choosing doors built to last a lifetime, adding prestige and value to any home or project.

Not all doors are created equal or meet Brenlo quality standards. We offer two exclusive lines of finest premium solid wood doors not available from other suppliers in Ontario: the "Platinum Series" and "Silver Series" are Brenlo's 2 and 3 panel IN-STOCK, primed and ready to install doors. These two solutions are considered the quality and value benchmark in the market and are only available from Brenlo.

Not every project space calls for a premium door solution. Brenlo also carries a wide variety of good quality builder grade hollow core, solid core and moulded panel doors that are a perfect affordable alternative when overall budget or less critical parts of a project call for it.

CUSTOM DOORS: In addition to stock door programs, Brenlo has a proven track record in providing custom and special order doors and getting it "Right and On Time" every time. We can produce doors in any size, species, style and finish you desire.

COMMERCIAL CUSTOM DOORS: Brenlo is a key supplier to many of the leading retail fixture and commercial millwork shops in Ontario for custom materials and doors. Doors for institutional, hotels, custom offices and the like require fire rated, fully engineered designs of the highest quality. Brenlo door suppliers can meet these demanding standards and unique custom needs.

Whatever your design or imagination calls for in Residential or Commercial applications, if you are looking for high performance truly unique custom doors, our dedicated special order door experts can source from a wide range of suppliers to have them designed and manufactured to suit, typically in 4 weeks.

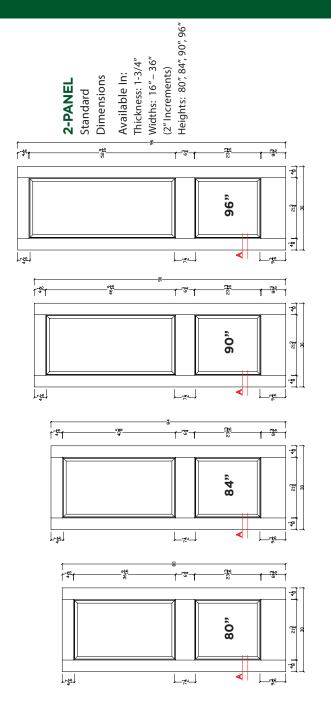

PREMIUM QUALITY - "BEST" DOORS

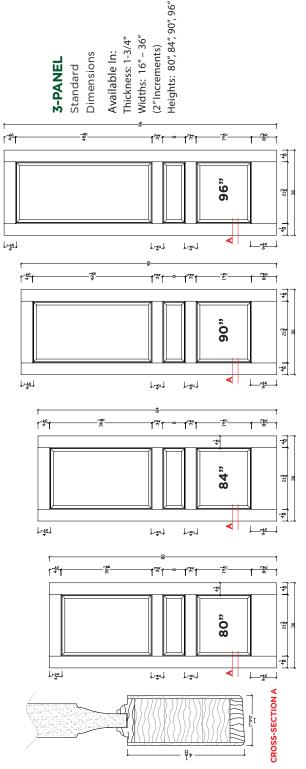

These doors are manufactured to be everlasting, durable, sound resistant and aesthetically beautiful. They hold a finish extremely

SILVER SERIES DOORS

SILVER SERIES DOORS

DOORS STOCK DOORS AT BRENLO

MIDRANGE QUALITY - "BETTER" DOORS

These doors are primarily the higher end of moulded "skin" doors with solid core, a variety of simulated panel designs and patterns in smooth or simulated wood grain finishes.

"SAFE N' SOUND" DOORS - MASONITE

A solid particle core, moulded MDF veneer door category often used in less prominent areas of custom homes such as secondary basement rooms, utility rooms, etc. Solid core has partial sound proofing effect.

- Available as 1-3/4" thickness, 80" high only
- 18" 36" width depending on pattern / style

ECONOMY QUALITY - "GOOD" DOORS

This category is a common sub-division home class of doors often sold by any big box home center retailer. Brenlo offers these doors as a convenience for customers who may use them in secondary locations of a project.

SOLID CORE SLAB DOORS

A solid particle core, Masonite veneer smooth flat door used in less prominent areas of custom homes such as secondary basement rooms, utility rooms, etc. Solid core has partial sound proofing effect.

- Available as 1-3/8" thickness in 80" AND 1-3/4" thickness in 96"
- 18" 36" width available

HOLLOW CORE DOORS

A hollow core, moulded or flat Masonite veneer door used in less prominent areas of custom homes such as secondary basement rooms, utility rooms, etc.

- Available as 1-3/8" thickness in 80" AND 1-3/4" thickness in 96"
- 18" 36" width depending on pattern / style

GRADING VENEERS

The term "grade" describes the natural characteristics allowed in each veneer or ply. The face ply in hardwood plywood is exposed, and therefore, the face grade defines the panel appearance and quality. Some panels have a face made of highly matched veneers with uniform colour and grade. Other panels may include more character marks and colour variation to comply with the desired appearance.

FACE GRADES

AA Best quality face is used where minimal defects are required for doors, architectural paneling, and fine furniture.

A AA is not required, but appearance is important for cabinets, case goods and general millwork.

B Natural characteristics and appearance are desirable.

C, D, E Solid face with unlimited colour variation. C, D, and E respectively allow repairs in increasing sizes.

DuraBoard

DURABOARD PW / DURATRIM SHEETS

Duraboard is a PVC / Wood composite board designed for exterior applications. It is a non-porous material that can be cut, routed, formed, etc. This product will not rot, twist or cup. May be used wherever wood trim is normally used, ideal for extension mud rails, fascia, soffits etc. Great for use in all the tough to trim places, where you want a long lasting product that will look just as good 20 years from the day you invest in it.

TRIMBOARD (UNPRIMED):

1" x 6" (3/4" x 5-1/2") x 16' 1" x 8" (3/4" x 7-1/4") x 12' & 16' 1" x 10" (3/4" x 9-1/4") x 12' & 16' 1" x 12" (3/4" x 11-1/4") x 12'

SHEETS:

1/4" (6mm) x 4' x 8' 1/2" (13mm) x 4' x 8' 1/2" (13mm) x 4' x 12' 3/4" (19mm) x 4' x 8' 3/4" (19mm) x 4' x 10' 3/4" (19mm) x 4' x 12'

Stocked Inventory A Available as special order

COLUMNS WOOD AND COMPOSITE

NOVAWOOD

Columns must be clearly specified as interior or exterior, load bearing or decorative.

POLY COLUMNS

Poly classic columns are available for interior or exterior.

Most customers prefer to use wood columns on the interior and poly on the exterior. Poly columns can be ordered as follows:

- A) Composite columns with poly caps and poly bases included in price
- B) Composite columns with aluminum caps and aluminum bases - additional charge.

Both aluminum and poly bases are sold as the standard Tuscan design base.

WOOD COLUMNS

Wood columns are available in two standard wood species:

- A) Pine or Fir for interior or exterior use (Allow 1-2 weeks for delivery)
- B) Custom wood columns in most species. (Allow 4-8 weeks.)

All columns can be made to exact specifications, ie. a 9ft (108") column can be ordered at 105-1/2".

Interior wood columns will normally be ordered with wood base and cap included in price.

Please note Brenlo recommends that all exterior wood columns are ordered with aluminum bases to maintain warranty.

Tuscan Base - RR Tuscan Base - RO

Attic Base

Novawood is Ash decking and siding lumber that has been thermally modified using high temperatures (1800 C - 2120 C), water vapour and pressure.

Through this treatment, Novawood achieves unparalleled stability and durability for exterior applications.

The thermal modification process takes 48–96 hours, depending on species, thickness and initial moisture content. Absolutely no chemical substances are used in the production process.

End Match Technology

This revolutionary technique allows for 100% usage of each board. The seams are NOT required to rest on support joists. This saves time measuring and cutting and gives a clean hardwood flooring look. Not to mention the design possibilities that are only limited by your imagination.

NOVAWOOD

DECKING IPE DECKING (TABEBUIA SPP)

Hidden Clip Technology

The Novawood deckboards we carry in stock are pre-grooved and joined together with custom hidden clips. These clips allow for perfect board spacing, clean lines and minimal hardware.

Key Features: Why Choose Novawood?

• 100% Natural – Absolutely no chemicals used during the entire Thermowood process.

• Environmentally Responsible – Harmless to human beings and all living species. Environmentally friendly, healthy, recyclable and strong.

• Durable & Stable – Performs in all weather conditions, outlasting many other species.

• Sustainable – Produced from sustainable forests. FSC Certified.

• Easy – Light weight, easy on tooling and machinery; planks are 100% usable.

• Homogeneous – Colour of wood is consistent throughout.

• Comfortable – 25% more acoustic and heat isolated than non-thermally modified wood. No hot feet, unlike plastic decking.

• Safe – 30% more fire resistant than normal lumber. Insect habitation is completely prevented. Resistant to decay and fungal growth. IPE: (tabebuia) is a South American Hardwood that is naturally strong, durable, and decay/termite resistant. The decking material is knot free and needs no preservative treatment. It can be left "raw" and will turn a natural grey colour or can be coated with a stain of your choice (IPE OIL recommended). Unlike other suppliers, Brenlo machine sands one side of all stock IPE to provide the user with a consistent smooth visible surface.

Performance: IPE is one of the densest hardwoods on earth three times the hardness of oak. As a result, it remains smooth and splinter free. Unlike soft woods, water absorption is slow and therefore will not cup, bow, or twist like other woods.

Applications: Ideal for patios and decks, piers, boat docks, outdoor furniture, walkways, bridges and paths, pool side benches and decks.

• AIR DRIED – EASED 4 EDGES

CUSTOM SHOP

Over the years Brenlo has become much more than just a wood moulding manufacturer. We focus on creating a unique product for our customers and in turn their clients. Our Custom Shop takes great pride in these products and solutions while in keeping with the vision of the project. We have once again expanded our manufacturing capabilities with the latest technology. We remain true to great craftsmanship and attention to detail. We now offer more Joinery and Bench-work type products. Some of the new products available are our specialty doors, over-sized porch brackets, courtroom and church pew components, solid wood laminated table/counter tops, C.N.C parts and components for the Store Fixture Industry.

Please call us for your next unique and challenging project; we can help you with it. See page 92 for examples of the craftsmanship our Custom Shop produces. If it's made of wood we can do it!

ARCHES & CURVES

Brenlo specializes in curved casings, backbands, crowns, baseboards, bar rails, chair rails and panel moulds.

Curves can be made from a template or from accurate measurements. Arches made from measurements for window casings tend to be the most accurate as they give a true consistent radius.

VERTICAL CURVES

Typical arch types are as follows:

Symmetrical Arch Elliptical Arch

Full Circle Arch

Please note all horizontal curves must be clearly specified as concave or convex applications.

HORIZONTAL CURVES

Convex Curve Profile is on the

Top View

Half Circle Arch

outside of the curve

rise(height) Chord (span)

HOW TO MEASURE CURVES

To make an arch window casing you need to have only two critical measurements. These measurements are as follows:

1) The accurate chord (inside width) of the casing line

2) The accurate rise (height) from your horizontal line (chord) to the inside of your casing line For a cost effective alternative, we also offer some profiles custom run in EZ Bend.

WOOD SPECIES

Whitewood (Poplar)

Hard White Maple Black Cherry

Knotty Pine

Other Species -

Burmese Teak
Soft Maple
Red Pine
Red Birch
Alder
IPE
Vertical Grain Fir

ENVIRONMENTAL COMMITMENT

Brenlo is well known for our commitment to sustainability and industry best practices when it comes to environmental compliance. We are FSC[®] Certified and have expert staff supporting our active involvement in the Canada Green Building Council, LEED building and AWMAC commercial standards

Respect for our natural resources and respect for the environment are two of the most important priorities at Brenlo Ltd. Our wood suppliers comply with all government regulations. Conservation of natural resources is also considered essential: hence, Brenlo's suppliers of wood products emphasize yield management by equipping their facilities with the latest technology available. Our suppliers are constantly seeking better ways to protect and sustain our natural resources that provide the raw material which we then mill and supply to you, our valued customer.

Brenlo's suppliers actively enforce all federal and regional Sustainable Forestry Initiatives, and support the standards set by the National Hardwood Lumber Association. These suppliers participate in, or meet the most rigid independent environmental certification programs including FSC certified products.

At Brenlo, we feel that it is our personal and professional responsibility to help sustain the forests, wildlife habitat and ecosystems that we depend on. It is our belief that a healthy environment and a sound and sustainable use of nature's treasures means a healthy future for all concerned.

ReStore

Brenlo is a proud supporter of

"RIGHT & ON-TIME" GUARANTEE.

Our reputation comes from quality products but even more from making sure that the best builders and contractors can bet their reputations on Brenlo getting everything right and delivering on schedule to a project. You can trust that we will do what we say and meet or exceed your expectations when it comes to reliability and consistency...OR WE WILL MAKE IT RIGHT.

FLEXIBLE DELIVERY MANAGEMENT

For house lots or projects involving multiple floors, extended or interrupted project timelines or flexible "just-in-time" delivery, Brenlo offers options to prepackage and then deliver on site by floor, by product type (i.e. jambs only, casing & jambs, doors separately, baseboard last) or any method that meets your

requirements.

CUSTOM MOULDING

In addition to over 300 stock profiles in this catalogue, Brenlo has produced over 7,000 custom profiles using our state of the art custom knife shop. If you don't see the design you are looking for, we will make it to order for you whether in small quantities, large volumes, special species, custom sizes or even different finishes like wire brushed or rough sanded.

HARDWOOD SPECIES AND D4S

We stock an extensive assortment of North American quality hardwood and softwood, as well as exotic hardwood species in various grades and thicknesses. In addition to finished trim, our in-house planing and ripping services allow us to provide rough sawn or dressed four sides (D4S) material sorted by width and

length for any application.

DOOR MACHINING

Brenlo has specialized machinery at our Racine location so we can pre-machine any doors ordered from Brenlo for hinges and door hardware. By machining them simultaneously with the door jamb material, matched sets of ready to install jambs and doors can be delivered together. Your installers will save time and have consistent fit and installation of every door. Please inquire about our low cost flat rate service per door.

Our 80,000 square foot manufacturing facility stocks the most comprehensive lumber inventory in the industry, with close to 2 million board feet!

ORDERING INFORMATION

DELIVERY CHARGE

Brenlo will apply a \$45.00 flat rate charge for each onsite load delivery within the GTA. Charges may apply for deliveries outside of Brenlo delivery boundaries. Please call the order desk to inquire.

DELIVERY ACCESS

Safety is very important at Brenlo. The customer is responsible for ensuring that there is adequate space available at the jobsite to receive the delivered products and that access to the area where the products are to be delivered is safe and free of obstacles (including, but not limited to, overhead wires, scaffolding, unlevel or muddy conditions and snow covered pathways). In the event that the Brenlo driver determines that access to the jobsite is unsafe, Brenlo reserves the right to defer delivery of the products ordered. Deliveries not accepted on-site following confirmation will be subject to a flat rate charge of \$150.

PAYMENT AND CREDIT

For all non-trade account orders, a non-refundable deposit is required to process the order. For prepaid and COD orders, Brenlo accepts company cheques, Visa, and Master card. To set up a trade account, a credit application must be submitted to our credit department for approval. All orders for in stock and custom items shall be C.O.D. until credit is approved.

NOTE: ALL PRODUCTS SOLD BY BRENLO LTD CUSTOM WOOD MOULDINGS WILL REMAIN THE PROPERTY OF BRENLO LTD. CUSTOM WOOD MOULDINGS UNTIL PAID IN FULL.

WARRANTY AND RETURNS

Unusable, defective**, or damaged material to be returned, replaced or credited must be identified and reported to Brenlo Ltd Custom Wood Mouldings within 48 hours of delivery. Brenlo is not responsible for any damage caused after delivery on the job site caused by handling, improper storage, and installation or finishing by the customer.

With prior approval from Brenlo and a product return authorization, Brenlo accepts and will credit any excess returned standard stock product or material that is undamaged and in full resalable condition. Returns of any non-door-related material less than 6' in length will not be eligible for credit. We charge a restocking fee of up to 20% to cover the pick-up and handling that is required.

LENGTH OF MOULDINGS

Unless otherwise agreed, Brenlo provides most moulding products in random lengths ranging from three to sixteen feet. We make our best efforts to ship the longest lengths available; however, we reserve the right to fulfill our customers' orders with any combination of standard builder lengths which meet the total order quantity for each item.

Any order for exact specified lengths will require additional processing time based on lumber availability, the need for custom milling and sorting and is subject to additional charges.

ACCURACY OF INFORMATION

Brenlo has made every effort to ensure the accuracy and completeness of the information contained in this catalogue, however, we are not responsible for any resulting costs or issues that may arise based on the specifications or any error or omission of detail in the catalogue. Product specifications are subject to change without notice.

INSTALLATION

For customers in need of assistance in installing their Brenlo mouldings, doors and other products, we would be pleased to refer you to one or more members of our family of recommended finishing contractors.

**Natural characteristics of wood including colour and grain are not considered defects. Stock profile samples are available upon request.
