WOOD-ALTERNATIVE

Exteriors | Interiors

- Limited Lifetime Warranty*
- Water-Resistant
- Paint or Stain
- Wide Range of Usage
- Thermoformable
- Sustainable

SCAN TO KNOW MORE

A percentage of FROGBOARD sales will be donated to protect local Frog habitats.

For over 30 years, Brenlo Custom Wood Mouldings & Doors has been the wood moulding supplier of choice among Luxury Custom Home Builders, Architects, and Designers. We have built a reputation in the industry for being passionate about quality.

This superior quality begins in our grinding room with our hand-cut knives made from top-quality carbide steel. Our knives are then moved to our state-of-the-art moulders where our operators only use kilned dried FAS lumber at a rate of 22 knife cuts per inch. The combination of expertly cut knives, quality rough lumber, and cuts per inch results in a smooth finish, free from chatter marks. After a strict defecting program at the end of the milling process, all material is transferred to our distribution facility, where quantities are confirmed, and additional quality checks are completed. Our end result is a wood moulding that has 99% usage and requires minimal preparation for painting or staining.

With just under 200,000 SQ.FT. of distribution and manufacturing space, Brenlo keeps an expansive in-stock inventory of trim, doors, and plywood to provide customers with the solution needed to complete a project "Right and On Time." Should our stock options not meet the requirements, our in-house CAD team can create and design any trim or door style required. Brenlo currently holds over 10,000 custom profiles for customers and ensures that custom orders are maintained in our library. Therefore, if the product is needed again, it is as simple as referencing the job name. Our advancements in manufacturing allow us to turn custom trim requirements around in 2 weeks and custom doors in 4-5 weeks.

At Brenlo, our company philosophy has always been "The easiest to do business with." This statement resonates with every employee, and we look forward to providing you with the best quality product supported by exceptional customer service.

Fraser Adams President at Brenlo

DOORS

SILVER SERIES DOORS

Not all doors are created equal or meet Brenlo's quality standards. We offer an exclusive line of the finest premium wood doors not available from other suppliers.

STOCK DOORS: Our stock program is leading the way in offering quality, premium craftsmanship on demand to our clients.

Our offerings include the following;

- Silver Series Raised 2 & 3 panel doors
- Shaker 1 & 2 panel doors
- Slab doors

All of these doors come 1 3/4" thick and are offered in 80", 84", 90" & 96" Heights. The available widths are 16"-36" widths (2 increments).

We also carry a budget friendly door style; Raised 2 Panel Moulded 80"H doors. These doors are carried in Hollow Core & Solid Core available.

Note: 80" height available only and are 1 3/8" thick

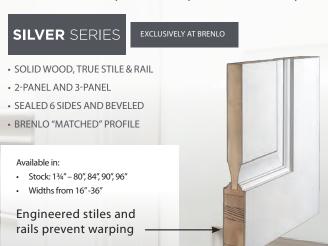

CUSTOM DOORS: Brenlo has a proven track record in providing custom and special order doors. We can produce doors in any size, species, style and finish you desire.

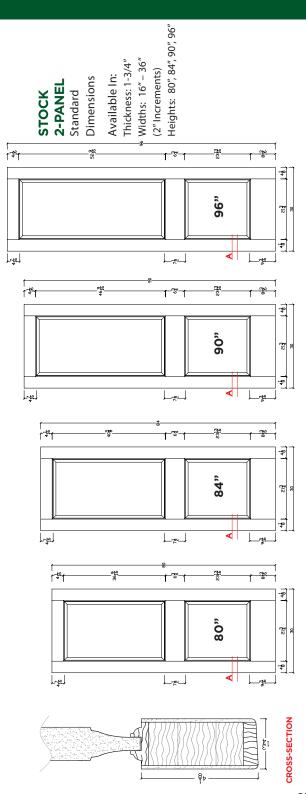

COMMERCIAL CUSTOM DOORS: We are a key supplier to many of the leading retail fixture and commercial millwork shops in Ontario for custom materials and doors. Doors for institutional, hotels, custom offices and the like require fire rated, fully engineered designs of the highest quality. We continue to meet these demanding standards and unique custom needs.

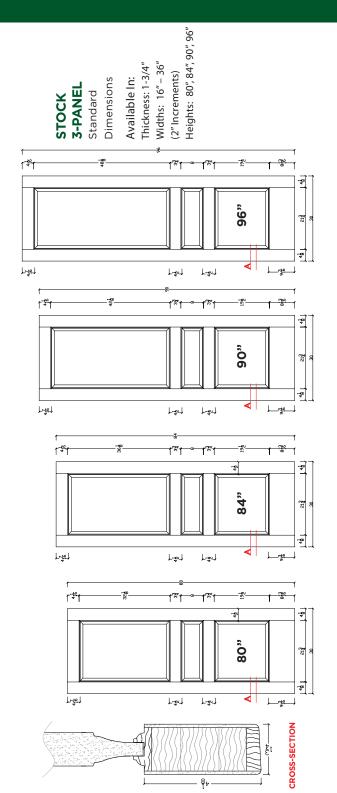

If you are looking for high performance truly unique custom doors, our door experts can have them designed and manufactured to suit, typically in 4 weeks.

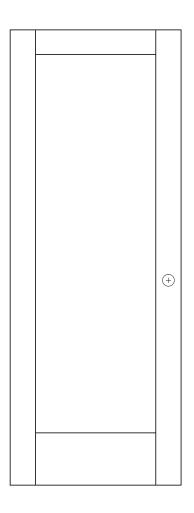

PREMIUM QUALITY - "BEST" DOORS

These doors are manufactured to be everlasting, durable, sound resistant and aesthetically beautiful. They hold a finish extremely

EXPLANATION OF VENEER AND CORE GRADES

GRADING VENEERS

The term "grade" describes the natural characteristics allowed in each veneer or ply. The face ply in hardwood plywood is exposed, and therefore, the face grade defines the panel appearance and quality. Some panels have a face made of highly matched veneers with uniform colour and grade. Other panels may include more character marks and colour variation to comply with the desired appearance.

FACE GRADES

AA Best quality face is used where minimal defects are required for doors, architectural paneling, and fine furniture.

A AA is not required, but appearance is important for cabinets, case goods and general millwork.

B Natural characteristics and appearance are desirable.

C, D, E Solid face with unlimited colour variation. C, D, and E respectively allow repairs in increasing sizes.

IPE: (tabebuia) is a South American Hardwood that is naturally strong, durable, and decay/termite resistant. The decking material is knot free and needs no preservative treatment. It can be left "raw" and will turn a natural grey colour or can be coated with a stain of your choice (IPE OIL recommended). Unlike other suppliers, Brenlo machine sands one side of all stock IPE to provide the user with a consistent smooth visible surface.

Performance: IPE is one of the densest hardwoods on earth three times the hardness of oak. As a result, it remains smooth and splinter free. Unlike soft woods, water absorption is slow and therefore will not cup, bow, or twist like other woods.

Applications: Ideal for patios and decks, piers, boat docks, outdoor furniture, walkways, bridges and paths, pool side benches and decks.

- AIR DRIED EASED 4 EDGES

FROGBOARD - NEW!

LIMITED LIFETIME WARRANTY

FROGBOARD is weather-resistant and comes with a limited lifetime warranty.

WATER-RESISTANT

FROGBOARD is resistant to UV, weather, rot, and pests. It is 100% water-resistant, thus, traditional wood maintenance and replacements are not needed.

CAN BE PAINTED OR STAINED

Unlike other wood alternatives available, FROGBOARD can be painted or stained. We recommend using water-based paint, stain, or sealer on FROGBOARD products. Please refer to www.brenlo.com/frogboard for coating recommendations.

INDISTINGUISHABLE FROM NATURAL WOOD

FROGBOARD looks like natural wood and comes in both smooth or grained texture.

THERMOFORMABLE

FROGBOARD can be bonded by heat and compression (heat-sealing).

With heat, the sheets can be bent, molded, or curved. It is a perfect fit for curved designed accents, furniture, and other applications.

MACHINABLE

FROGBOARD is workable with standard woodworking tools and doesn't require additional substitutes. It is easy on screwing, nailing, cutting, drilling, sanding, and milling.

SUSTAINABLE

FROGBOARD is a green alternative that relies on dried rice hulls and is yet another initiative from Brenlo to take sustainability as a priority. It is free of phenol, formaldehyde, and adhesives. It is 100% recyclable.

Novawood is Ash decking and siding lumber that has been thermally modified using high temperatures (1800 C - 2120 C), water vapour and pressure.

Through this treatment, Novawood achieves unparalleled stability and durability for exterior applications.

The thermal modification process takes 48–96 hours, depending on species, thickness and initial moisture content. Absolutely no chemical substances are used in the production process.

End Match Technology

This revolutionary technique allows for 100% usage of each board. The seams are NOT required to rest on support joists. This saves time measuring and cutting and gives a clean hardwood flooring look. Not to mention the design possibilities that are only limited by your imagination.

NOVAWOOD

Hidden Clip Technology

The Novawood deckboards we carry in stock are pre-grooved and joined together with custom hidden clips. These clips allow for perfect board spacing, clean lines and minimal hardware.

Key Features:

Why Choose Novawood?

- 100% Natural Absolutely no chemicals used during the entire Thermowood process.
- Environmentally Responsible Harmless to human beings and all living species. Environmentally friendly, healthy, recyclable and strong.
- Durable & Stable Performs in all weather conditions, outlasting many other species.
- Sustainable Produced from sustainable forests. FSC Certified.
- Easy Light weight, easy on tooling and machinery; planks are 100% usable.
- Homogeneous Colour of wood is consistent throughout.
- Comfortable 25% more acoustic and heat isolated than non-thermally modified wood. No hot feet, unlike plastic decking.
- Safe 30% more fire resistant than normal lumber. Insect habitation is completely prevented. Resistant to decay and fungal growth.

BRENLO CUSTOM SHOP

Brenlo will custom make solid wood laminated panels. Panels can be made in a variety of widths and lengths. Laminated panels are often used for bar tops, stair treads & other high use applications. These products can be made in virtually any species. Please contact our order desk or fax details and specifications of your requirements to us @ (416) 749-8969.

Our C.N.C.Router machining quarter cut white oak furniture components

Curved oak crowns, chair rails and base boards for wrapping of large oak columns

Architect designed large exterior pine porch brackets for a custom home builder

Another unique design of 3'x 4' porch brackets

CUSTOM SHOP

Over the years Brenlo has become much more than just a wood moulding manufacturer. We focus on creating a unique product for our customers and in turn their clients. Our Custom Shop takes great pride in these products and solutions while in keeping with the vision of the project. We have once again expanded our manufacturing capabilities with the latest technology. We remain true to great craftsmanship and attention to detail. We now offer more Joinery and Bench-work type products. Some of the new products available are our specialty doors, over-sized porch brackets, courtroom and church pew components, solid wood laminated table/counter tops, C.N.C parts and components for the Store Fixture Industry.

Please call us for your next unique and challenging project; we can help you with it. See page 92 for examples of the craftsmanship our Custom Shop produces. If it's made of wood we can do it!

ARCHES & CURVES

Brenlo specializes in curved casings, backbands, crowns, baseboards, bar rails, chair rails and panel moulds.

Curves can be made from a template or from accurate measurements. Arches made from measurements for window casings tend to be the most accurate as they give a true consistent radius.

VERTICAL CURVES

Typical arch types are as follows:

Fllintical Arch

Please note all horizontal curves must be clearly specified as concave or convex applications.

HORIZONTAL CURVES

Profile is on the inside of the curve

Profile is on the outside of the curve

HOW TO MEASURE CURVES

To make an arch window casing you need to have only two critical measurements. These measurements are as follows:

- 1) The accurate chord (inside width) of the casing line
- 2) The accurate rise (height) from your horizontal line (chord) to the inside of your casing line For a cost effective alternative, we also offer some profiles custom run in EZ Bend.

ENVIRONMENTAL COMMITMENT

Brenlo is well known for our commitment to sustainability and industry best practices when it comes to environmental compliance. We are FSC® Certified and have expert staff supporting our active involvement in the Canada Green Building Council, LEED building and AWMAC commercial standards

Respect for our natural resources and respect for the environment are two of the most important priorities at Brenlo Ltd. Our wood suppliers comply with all government regulations. Conservation of natural resources is also considered essential: hence, Brenlo's suppliers of wood products emphasize yield management by equipping their facilities with the latest technology available. Our suppliers are constantly seeking better ways to protect and sustain our natural resources that provide the raw material which we then mill and supply to you, our valued customer.

Brenlo's suppliers actively enforce all federal and regional Sustainable Forestry Initiatives, and support the standards set by the National Hardwood Lumber Association. These suppliers participate in, or meet the most rigid independent environmental certification programs including FSC certified products.

At Brenlo, we feel that it is our personal and professional responsibility to help sustain the forests, wildlife habitat and ecosystems that we depend on. It is our belief that a healthy environment and a sound and sustainable use of nature's treasures means a healthy future for all concerned.

Brenlo is a proud supporter of

SERVICES WE OFFER

CONSISTENT QUALITY

You can trust that we will do what we say and meet or exceed your expectations when it comes to reliability and consistency.

FLEXIBLE DELIVERY MANAGEMENT

Brenlo offers options to pre-package and then deliver on site by floor, by product type (i.e. jambs only, casing & jambs, doors separately, baseboards last) or any method that meets your requirements.

CUSTOM MOULDING

If you don't see the design you are looking for, we will make it to order for you whether in small quantities, large volumes, special species, custom.sizes.

HARDWOOD SPECIES

We stock an extensive assortment of North American quality hardwood and softwood, as well as exotic hardwood species in various grades and thicknesses.

DOOR MACHINING

Brenlo has specialized machinery so we can premachine any doors ordered from Brenlo for hinges and door hardware. Your installers will save time and have consistent fit and installation of every door. Please inquire about our low cost flat rate service per door.

ORDERING INFORMATION

DELIVERY CHARGE

Brenlo will apply a flat rate charge for each on-site load delivery within the GTA. Charges may apply for deliveries outside of Brenlo delivery boundaries. Please call the order desk to inquire

DELIVERY ACCESS

The customer is responsible for ensuring that there is adequate space available at the jobsite to receive the delivered products and that access to the area where the products are to be delivered is safe and free of obstacles. In the event that the Brenlo driver determines that access to the jobsite is unsafe, Brenlo reserves the right to defer delivery of the products ordered.

PAYMENT AND CREDIT

For all non-trade account orders, a non-refundable deposit is required to process the order. For prepaid and COD orders, Brenlo accepts company cheques, Visa, and Master card. To set up a trade account, a credit application must be submitted to our credit department for approval. All orders for in stock and custom items shall be C.O.D. until credit is approved.

NOTE: ALL PRODUCTS SOLD BY BRENLO LTD CUSTOM WOOD MOULDINGS WILL REMAIN THE PROPERTY OF BRENLO LTD. CUSTOM WOOD MOULDINGS UNTIL PAID IN FULL.

WARRANTY AND RETURNS

Unusable, defective**, or damaged material to be returned, replaced or credited must be identified and reported to Brenlo Ltd Custom Wood Mouldings within 48 hours of delivery. Brenlo is not responsible for any damage caused after delivery on the job site caused by handling, improper storage, and installation or finishing by the customer.

With prior approval from Brenlo and a product return authorization, Brenlo accepts and will credit any excess returned standard stock product or material that is undamaged and in full resalable condition. Returns of any non-door-related material less than 6' in length will not be eligible for credit. We charge a restocking fee to cover the pick-up and handling that is required.

NOTES

LENGTH OF MOULDINGS Unless otherwise agreed, Brenlo provides most moulding products in random lengths ranging from three to sixteen feet. Any order for exact specified lengths will require additional processing time based on lumber availability, the need for custom milling and sorting and is subject to additional charges. **ACCURACY OF INFORMATION** Brenlo has made every effort to ensure the accuracy and completeness of the information contained in this catalogue, however, we are not responsible for any resulting costs or issues that may arise based on the specifications or any error or omission of detail in the catalogue. Product specifications are subject to change without notice. **Natural characteristics of wood including colour and grain are not considered defects. Stock profile samples are available upon request.
